

Coppabella Mine MIA

Our first project at Coppabella Mine was the design and construction of a 9-bay maintenance workshop for CAT 793 trucks.

The facility included a 20 tonne overhead crane, wash facilities, stores facility, administration block and ablution area. Hawkins Group's success with this major facility led to an expansion project in 2013. [See Ultraclass Facility \(Stage 2\).](#)

Client:

Macarthur Coal

Location:

Coppabella Mine, Central Queensland

Project value:

\$6 million

Contract type:

Design and construct

Completed:

2009
