

Moorvale Mine MIA

This extensive project involved Hawkins Group in the design and construction of a maintenance facility for CAT793 trucks and included a four-bay workshop, 20-tonne overhead crane and offices.

We also upgraded the wash facilities for both light and heavy vehicles. To construct these facilities 95 tons of structural steel was fabricated in our Brisbane workshop and transported to site.

Client:

Macarthur Coal

Location:

Moorvale Mine, Central Queensland

Project value:

—

Contract type:

Design and construct

Completed:

2008
